## Jumbolino

# Jumbolino

## Contents

6 Jumbolino puzzle cards

2 Coloured dice

1 Rules sheet

## Before you start

Remove all the pieces from the frames and place both the frames and the pieces in the middle of the table with the illustrations facing up. The youngest player begins followed by those to their left.

## The object of the game

The player to complete the most Jumbolino puzzles by the end of the game is the winner!

## The game begins

Taking turns, roll both dice - the first player to roll a red colour takes a Jumbolino puzzle frame from the pile. If you throw double red you're in luck, and you may take two puzzle frames. If you roll a red and another colour you can also immediately take that piece of the puzzle.

## Collecting parts

You can only start collecting puzzle pieces of a Jumbolino character if you have its frame. Which means, you need to roll a red colour before you can start collecting other parts. On rolling two different colours you can collect up to two parts of any puzzle you have, to build your character. If you already have these parts your turn ends. Puzzle pieces can be collected in any order.

## Rolling double colours

If you roll a double colour you can decide what to do. You can either collect **TWO** frames or **TWO** pieces of that same colour (as long as you already have the frame for that character). Or you can choose **ONE** piece of any colour for another frame you already have.

## Who wins?

The player who has the most complete Jumbolino puzzles wins! If all the puzzles but one are complete, the player who has got the first two pieces of the last puzzle may consider this character to be theirs.

## For an even more exciting game!

1. You throw a double black. You may take a complete Jumbolino puzzle from the table. If there is no complete puzzle left, the player who has got a complete Jumbolino puzzle must give it to you. If more than one player has got a complete puzzle, you can choose who has to give it to you.

2. You throw a double red, but there are no frames left on the table. You may then take a frame from another player, but only if their Jumbolino Puzzle does not yet consist of more than four pieces. Any of the pieces that have already been joined to the Puzzle Frame, must be put back in the middle of the table.
