Horrid Henry

Slide & Find Game

Rules of the Game

2 - 4 players

Slide & Find is a new and exciting memory game, but it is not just a memory game. You also need a little luck! Turn over one of the cards, throw the dice and try to look for the matching picture card by moving one of the sliding cards. The person who has found the most pictures at the end of the game is the winner!

Content

- 16 Square picture cards
 - 15 Sliding cards
 - 1 Frame with the 16 round playing cards
 - 1 Dice
- Rules of the game

Before you start

1. Take all parts (except the interior) out of the box. Press the picture, sliding and playing cards carefully out of the cardboard frames and lay them on the table. Ensure that the square cardboard frame - with the 16 round holes - remains in the game. The rest can be placed in the recycling bin.
2. Place the open box (including the interior) into the centre of the table. Shuffle the 16 square Horrid Henry picture cards and deal them to all players. Each player then puts their picture cards next to each other with the picture face up in the box. This ensures the cards are placed so that no one has a particular order.
3. Next, place the square frame with the round holes on top of these picture cards. Ensure that the smooth side is face up.
4. Now cover all except one of the pictures with the help of the 15 sliding cards. Ensure that the sliding cards are placed with the Horrid Henry hand print face up. One of the images remains uncovered.

This is how you play

Shuffle the playing cards and lay them in a stack on the table picture side down. The youngest player starts by turning over one of the playing cards. Lay this playing card so that all players can see it properly. Throw the dice and move one of the sliding cards as often as the dice indicates. You are not allowed to move two or more sliding cards simultaneously.

If you have thrown a 3, then you can slide a card no more than 3 times. Try to find the matching picture within the number as shown on the playing card. If you succeed you keep that playing card, and turn over the next card and repeat the process.

Have you found the matching picture within the moves allowed? If not then your turn is finished and it is the turn of the next player on your left. This player now throws the dice and tries to find the same matching picture.

Who wins?

The person who has found the most matching picture cards at the end of the game is the winner! Are there players with the same number of cards? Then they are all winners.
